

Our **mandate**

The **ISQ's Data Access Services** share a vast amount of administrative and survey data with authorized research teams.

Access to these data is provided within a **rigorous** framework that complies with **confidentiality** and **security** rules.

The research work and findings that result from our services help to better understand Québec society and its evolution and are driving many advances in the research community.

Our **strengths**

Multi-sector datas

- ✓ We make available administrative and survey data related to all aspects of society (demography, education, health, income, etc.).
- ✓ We leverage these data by allowing data linkage for multi-sector research projects.

Data protection and compliance with security rules

- ✓ In order to maintain public confidence, confidentiality rules are strictly enforced so that the use of data does not allow for the re-identification of individuals.
- ✓ Our security rules ensure strict control over both computer and physical access.

Our **objectives**

Providing quality service to our clients, meeting the diverse needs of the research community, and ensuring data confidentiality.
