

Québec Cannabis Survey – 2018

Questionnaire Anglais

Direction des statistiques de santé
Mars 2018

P1 In this survey when we use the term cannabis, this includes marijuana (pot, weed), hashish (hash), liquid concentrates (hash oil), solid concentrates (shatter, budder, wax) or any other products made from the cannabis plant, but not synthetic cannabinoids (Spice, K2, Yucatan Fire etc.).

When we ask about cannabis use, this includes using cannabis for recreational or medical purposes, either by smoking it, vaping it, eating it in an edible product, or consuming it in any other way.

READ AS NEEDED: Synthetic cannabinoids are manufactured in laboratories and are often sprayed onto dried plant material, mimicking certain effects of cannabis.
